DSDP Data Scientist | LinkedIn | Portfolio

SUMMARY

Highly Analytical Data Scientist with hands-on experience delivering 3+ end-to-end projects, turning large, unstructured datasets into impactful data outputs for environment, retail, automobile, and other sectors. Skilled in building visual and data-led stories using a diverse toolkit (Python, R, SQL, D3.js, Power BI, Excel) and a track record of translating analysis into stakeholder-ready insights; for both specialist and non-technical audiences. Comfortable owning projects in high-paced commercial and research environments. Looking for full-time roles sponsoring Skilled Worker Visa (open to UK-wide relocation).

SKILLS

Business Intelligence & Dashboarding: D3.js, Plotly, Dash, ChartJS, Excel, Power-BI (self-learning)
Analysis: Python, R, SQL, LaTeX, Regression, Forecasting, Statistical Learning, A/B Testing
Data Engineering: ETL Pipelines, Data Warehousing, SQL, SQLAlchemy, SQLite, Data Governance
Interpersonal: Stakeholder Management, Cross-Functional Collaboration, Project Management, Leadership, Client and Business Reporting, Problem solving, Agile mindset

WORK EXPERIENCE

Data Scientist (DSDP), Leeds Institute for Data Analytics Sep-2025 to Sep-2026

- Led 2 end-to-end data science projects as sole technical lead, delivering commercial and research insights for a **Major UK Supermarket retailer (NDA) and SYSTRA UK & Ireland**; built stakeholder relationships across technical and non-technical teams, turning data into dashboards that are being used to a) push research in explainable-AI systems & b) address the impact of consumer-side emissions from food purchases in the UK.
* Delivered insights to technical & non-technical audiences with 2 published case studies, 7 presentations, co-authored 1 research paper (IJBNPA) & tutorial (EuroVis); attended 9+ networking events.
* Showed promising growth in achieving professional and mentoring targets with strong leadership, proactive planning, open communication & stakeholder management.
- Sustainable Food Sales Explorer: Engineered a data pipeline processing 364 files of customer transactions into structured environmental footprint datasets (**160 million instances) for 27,000 unique products**; designed interactive visualisation prototypes for iterative user-testing with HASP - **analysing seasonality of consumer footprints across the year,** cultural events, public holidays, etc.

- PIPVIS Dashboard: Built a Python-based pipeline using hours HD 30 FPS road footage as **15 million rows** of annotated data turned into 7+ custom D3.js visualisations (designed with SYSTRA UK & Ireland); **helping make AV black-box behaviour interpretable** for researchers (awarded Highly Commended ECR).

Technology Consultant, Ayris Global Sep-2024 to Aug-2025

- Took responsibility for the redesign of departmental reporting from initial scope to a fully automated process, translating technical outputs from 3 department workflows into decision-ready language.
- Validated 5+ time-series model outputs against external benchmark datasets, improving forecast accuracy by 12% through sensitivity analysis and model refinement.

Data Analytics Intern, AdVenture NorthEast Aug-2024 to Oct-2024

- Developed prototype KPI-tracking dashboards (Plotly, Dash) to be adopted by strategy and data teams, consolidating prior models and static charts into an effective end-product that unifies data decisions.
- Improved reporting of predictive models for sales forecasting and customer segmentation, directly informing dashboard objectives alongside iterative development with a cross-team collaboration.

EDUCATION

MSc. Data Science & Analytics, University of Leeds, UK Sep-2023 to Dec-2024

- Achieved Grade: First Class with Distinction
- Relevant Modules: Statistical Learning (R/Excel), Business Analytics & Decision Science, A/B testing

B.Tech. Computer Science & Engineering (with IOT), SRMIST, India July-2019 to May-2023

- Achieved CGPA: 9.30/10 (First Class with Distinction)
- Relevant Modules: Database Management System (SQL), AI / ML, Big Data, Cloud Computing, UNIX, Bash

RELEVANT PROJECTS

Digital Twins for UK's National Student Survey (NSS), Dissertation project for Masters course

- Developed AI-powered digital twins simulating student responses across England, Wales, and Scotland with 3 years of NSS survey data; helping **uncover trends to improve student satisfaction** across the UK.

- Applied regression modelling and deep learning methods to identify response drivers, presented via a LaTeX-authored research report; awarded distinction for analytical rigour and documentation.

FIFA-STAT, Stat Visualizer for Players in the FIFA game franchise, Personal Project

- Created an interactive Dash/Plotly dashboard visualising 6 seasons of FIFA player data (FIFA-18–23); allowing **custom exploration of in-game statistics,** evaluating player growth with real-world data.

- Published a Medium article about the app which produced a 15% increase in dashboard traffic by month 3; supported by 2 case-studies demonstrating the analysis that the tool can support.

Review of Painting-Style Predictors, Madras Scientific Research Foundation (Internship)

- Led project's delivery by guiding an inter-disciplinary team of researchers to assess the scope and evaluation of AI systems predicting painting-styles, to **build accessible tools for art education.**
- Facilitated weekly knowledge-sharing sessions to foster cross-functional collaboration, organized resources and communication channels with reviewers to discuss early results and potential blockers.

CERTIFICATIONS / ACHIEVEMENTS

Award: Highly Commended Early Career Researcher, LIDA - Digital Footprints 2026 (news article)
Award: Distinction in dissertation and coursework for MSc. Data Science & Analytics, University of Leeds
Award: MecSimCalc Hackathon 4.0 (Runner-Up) (blog post mention)
Publication: Indian Sign Language Character Recognition System, IEEE Publication (academic paper)
Certification: Microsoft Office Specialist: Excel Associate; during MSc. degree (2023) (certificate)
Certification: Oracle Foundations Associate; earned during B.Tech degree (2021) (certificate)

EXTRA-CURRICULARS

Leeds Music Album Review Society, University of Leeds

- Alumni member and ex-volunteer in bi-weekly society events, conducted 3 interactive listening sessions for albums, encouraging discussions over themes, identities, and artist trivia.

Dance Club, SRM Institute of Science and Technology

- Performed in 2 cultural events along with on-campus roadshows clinching 2 awards in the span of 3 years. Mentored and coordinated with joinees to take on new dance forms.
